Vol. VII Thursday, December 6, 1945 No. 13

COLLARDS AND COMMONSENSE

Depend on it most every time, the old folks had found out most everything worth knowing. Now and then we find a new wrinkle worth while, but our forefathers had something about as good. Their knowledge was the proven product of the centuries, things that had proved their merit, the result of tedious trial and costly error.

Now we see elsewhere in this newspaper an article sent out by the State Agricultural Extension Service which extols the virtues of collards. Collards are known to all of us as a hardy vegetable that thrives well in winter and is famous after frost, for cold weather eating, when well-boiled with fine pork; and which has a delectable drink as a by-product known as "pot-likker."

So we see how the old folks got their start as babies. They didn't have oranges but they had collards and pot-likker. They didn't have much milk but now we are told collards were just as nourishing.

If every family did its best to grow a garden full of collards in winter, we would be better off in more ways than one.

About Your Neighbors
